| 21. | is the percentage of total market sales held by one brand or business. | | | | | |
| | A. Market share | B. Market segment | C. Market | D. Mass market | | |

22. A business is one which carries out market research to find out consumer wants before a product is developed and produced. A. secondary research B. market-oriented C. questionnaires D. market research 23. is the unique name of a product that distinguishes it from other brands. B. packaging C. brand name D. brand loyalty A. brand image 24. Which of following term means authority to pass down from superior to subordinate? A. organizational chart B. delegation C. authority D. chain of command

PART 2: Read the article and decide if these statements are True or False. (1 MARK)

- 25. People are responsible for their own careers. TRUE
- 26. You will not necessarily be promoted. TRUE
- 27. To choose your career, first you have to know yourself. **TRUE**
- 28. It's impossible to know what your career will be in the future. **FALSE**
- 29. It's better to set yourself very ambitious goals. **FALSE**

IT'S TIME TO TAKE CONTROL

Did you answer 'yes' to any of these questions? Then you could be ready for a new job or even a complete change of career. But don't wait until someone offers you a new and exciting opportunity. Don't expect someone else to find the perfect job for you. It's time to take control. Here are some tips to help you:

Get to know yourself

Explore your unique gifts and abilities; find out what excites you; look for a career you can be passionate about. There is a job out there that is perfect for you.

Improve your skills

Training courses and seminars can bring you new skills and qualifications. Lifelong learning can open doors and offer you a new direction.

Redefine progress and success

Don't take automatic promotion for granted; be prepared to push yourself and take some risks to help you move forward.

Be adaptable

As the world changes, your job is changing; be prepared to adapt to rapid change.

Stay up-to-date

Keep yourself informed of the technological developments which affect your career.

Be realistic

Set goals that are specific, and achievable; move step by step towards these goals; and find what you need to help you take the first step.

Plan for the future

You could move to a new organization, stay with your current organization, start a completely new career, or create your own business. Although the future is uncertain, your future is not completely unpredictable; think about your options. Remember, the choice is yours.

PART 3: Read the article and match the given reasons why organizations fail with each numbered paragraph. *You will not need to use all the reasons*. (1.2 MARKS)

A. ineffective leaders F. inability to change

B. lack of focus G. deficient client service

C. inadequate planning H. incompetent staff

D. bad products I. bad luck

E. communication breakdown

J. technological problems

| 2. communication orealists with | | | | | |
|--|--|--|--|--|--|
| It may come as a surprise to learn that Henry Ford went bankrupt five times before he ever made | | | | | |
| money from making cars and once said: 'I strongly believe there is often more to be learned from | | | | | |
| failure than from success if we but take the time to do so.' His famous words are still valid today. | | | | | |
| Lessons can be learned from business failures, and practices can be developed that prevent failure | | | | | |
| from repeating itself. The authors of this article carried out a survey on managers, asking what factors | | | | | |
| they thought contributed to business failure. From the survey, six of the top causes were as follows: | | | | | |
| (30) (A. ineffective leaders) Poor leaders are likely to make bad decisions and organizational | | | | | |
| performance will suffer as a direct result. | | | | | |
| (31) (E. communication breakdown) Having the proper flow of information as well as useful | | | | | |
| interaction with others is critical in getting good results. Communication is the lifeblood of any | | | | | |
| organization and, when breakdowns occur, performance will be seriously affected. | | | | | |
| (32) (B. lack of focus) Vision is vital for goal-setting and team-building. Otherwise, managers | | | | | |
| become unwilling to take risks and this has a negative effect on innovation and problem-solving. | | | | | |
| (33) (C. inadequate planning) Failure to plan leads to failure to organize and control | | | | | |
| operations. This can result in every problem leading to a crisis that demands an immediate solution. | | | | | |
| (34) (F. inability to change) Resistance to change can produce stagnant organizations that | | | | | |
| fail to exploit new avenues of opportunity. | | | | | |
| (35) (G. deficient client service) Organizations fail when people across all departments lose | | | | | |
| sight of who the customers are and how they can be reached. | | | | | |
| These results show that managers feel that business leaders can do more to improve their organization | | | | | |
| by solving easily recognizable problems. The difficulty is that such problems are often deeply rooted | | | | | |
| and interrelated, making them difficult to change in practice. One manager said, 'When we do a good | | | | | |
| job of managing and leading our people, it is amazing how well things flow, but when we take our | | | | | |
| eye off the simple and even basic things, trouble lies ahead.' | | | | | |

PART 4: Answer questions 36-48 which are based on Reading Passage below. (3 MARKS)

CHANGES IN INTERNATIONAL COMMERCE HOW ETHICS

AND FAIR-TRADE CAN MAKE A DIFFERENCE

The purpose of international commerce is to buy things from and sell things to people in other countries. Hundreds, and indeed thousands, of years ago, this actually worked quite well. People who travelled to foreign lands, often by ship, would take with them items for trade. Agricultural countries would, for example, trade olive oil or wine for weapons or other worked items. All that needed to be negotiated was a fair'price'for the items. (How many axes is a barrel of oil worth, for example?) Currency did not enter into the first deals but, even when it did, few problems existed to complicate matters barring disagreements over the value of goods.

Today, fixing a fair price remains at the centre of international commerce. When we look at the deal from the point of view of the seller, market research must determine the price at which the goods will be sold. This may vary greatly from country to country and people are often surprised to see exactly the same item for sale at two or three times the price it sells for in another country. Taxation and local government controls are sometimes behind this, but often it comes down to the fact that people in poor countries simply cannot afford to pay the same amount of money as those in rich countries. These are the things a seller has to bear in mind when preparing a price list for goods in each country.

In most cases, the purpose of setting a suitable price is to sell the maximum number of units. Usually, this is the way to guarantee the biggest profit. One exception is in the selling of luxury or specialist goods. These are often goods for which there is a limited market Here, slightly different rules apply because the profit margin (the amount of money a producer makes on each item) is much higher. For instance, nearly everyone wants to own a television or a mobile phone, and there is a lot of competition in the area of production, forcing the prices to be competitive too. The producers have to sell a large number of items to make a profit because their profit margin is small. But not everyone wants to buy hand-made jewellery, or a machine for sticking labels onto bottles. This enables the producer to charge a price much higher than the cost of making the item, increasing the profit margin. But at the heart of any sale, whether they sell many items for a small profit, ora few items for a large profit the prime motivation for the producer is to make as much profit as possible.

At least, that was the case until relatively recently when, to the great surprise of many, companies started trading without profit as their main objective. Ethical trade began as an attempt to cause as little damage as possible to the producers of raw materials and manufactured goods in poor countries. This movement put pressure on the industry to see to it that working conditions and human rights were not damaged by the need for poorer people to produce goods. In short, it drew to the world's attention the fact that many poor people were being exploited by big businesses in their drive to make more profit.

There have been many examples throughout the developing world where local producers were forced by economic pressure to supply cash crops such as tea, coffee and cotton to major industries. These people are frequently not in a position to fix their prices, and are often forced by market conditions to sell for a price too low to support the producers and their community. Worse still, while the agricultural land is given over to cash crops, it robs the local people of the ability to grow their own food. In time, through over-production, the land becomes spent and infertile, leading to poverty, starvation, and sometimes the destruction of the whole community.

Fair trade policies differ from ethical trade policies in that they take the process a stage further. Where ethical policies are designed to keep the damage to a minimum, fair trade organisations actually work

to improve conditions among producers and their communities. Fairtrade organisations view sustainability as a key aim. This involves implementing policies where producers are given a fair price for the goods they sell, so that they and their communities can continue to operate.

Although many big businesses are cynical about an operation that does not regard profit as a main driving force, the paradox is that it will help them too. With sustainability as their main aim, fair trade organisations not only help the poorer producers obtain a reasonable standard of living, but they also help guarantee a constant supply of raw materials. This form of sustainability benefits everyone, whether their motive is making a profit or improving the lives of the world's poorer people.

Questions 36-40

Classify the following as being a result of

A fair-trade policies

B ethical trade policies

C a country being poor

Write the correct letter, A, B or C. (1 MARK)

- **36.** (C) Manufactured goods are obtainable at a lower price than elsewhere.
- 37. (B) Harm to producers of raw materials is minimised.
- **38. (B)** Human rights are respected.
- **39.** (C) Land is not used to produce food for the local population.
- **40.** (A) The local community has more chance of survival.

Ouestions 41-43

Choose the correct letter, A, B, C or D. (0.75 MARKS)

41. According to the writer, what might early traders have disagreed about?

A. the comparative values of the goodsC. which items they wanted as exchange

B. which currency to use for their deal D. the quality of the goods being traded

42. What is the main consequence of a product being in demand?

A. higher prices C. fewer items being produced

B. smaller profit marginsD. less market competition

43. How might an agricultural community be destroyed?

- A. because companies in richer countries steal from them
- B. because they ask an unrealistically high price for their produce

C. because they over-use the land in order to grow cash crops

D. because the crops take much too long to grow

Questions 44-48

Complete the flow chart below. Use NO MORE THAN THREE WORDS from the passage for each answer. (1.25 MARKS)

This is the end of the Test.
